

# UF Infra

## 1- Installation du serveur Linux :

- Aller sur « VMware Workstation »
- Cliquer sur « Create a new virtual machine »
- Cliquer sur Browse et choisir « Ubuntu-18.04.0 - desktop-amd64 »

- Choisir un nom d'utilisateur et le mot de passe

The image shows a screenshot of the 'New Virtual Machine Wizard' window, specifically the 'Easy Install Information' step. The window has a title bar with the text 'New Virtual Machine Wizard' and a close button (X) in the top right corner. Below the title bar, the section 'Easy Install Information' is displayed, with the subtitle 'This is used to install Ubuntu 64-bit.' Below this, the 'Personalize Linux' section contains four input fields: 'Full name:', 'User name:', 'Password:', and 'Confirm:'. The 'Full name:' field is currently empty and has a blue border. The 'User name:', 'Password:', and 'Confirm:' fields are also empty. At the bottom of the window, there are four buttons: 'Help', '< Back', 'Next >', and 'Cancel'. The 'Next >' button is highlighted. Below the window, a small portion of another window is visible, showing the text 'This product is not licensed and is'.
